Pro Global Media Ltd
Est. 1996

Pro Global Media aims to be the most-trusted, the most highly-regarded, and the market-leading provider of information and events to the global building materials industries.

INTRODUCTION

Dear readers,

Welcome to the *Pro Global Media Book 2026*, where you will find details of opportunities that our *Global Cement*, *Global Gypsum* and associated brands (see opposite) can offer you and your business. Our magazines, newsletters and directories are among the most widely-read publications in their respective areas of expertise, and our websites and social media are the leaders in the industry.

In 2025, our slickly-organised conferences showed their great value as focused niche events, with great speakers, brilliant networking and superb potential for business. Global CemCCUS, Global Slag, Global CemFuels, Global FutureCem, Global Gypsum and Global Insulation are all the leaders in their fields. Our newly-launched CementAI seminar (2025) and conference in 2026, and the new CemFuels Asia conference in 2026 will expand opportunities for everyone.

As you can see on the front cover of this Media Book, our aim is to be the most-trusted, most highly-regarded and market-leading provider of information and events to the building materials industries. We continue to work hard on that aim...

We are able to offer a very strong B2B package to our customers in cement, gypsum, insulation, slag, decarbonisation, CCUS and related fields, helping you to get your message across to difficult-to-access potential customers. We hope that you will find what you are looking for in this *Pro Global Media Book 2026*. We look forward to hearing from you soon!

Analysis

Will Mexico be the new powerhouse for Holcim?

Holcim Mexico has been promoting itself as the lynchpin of the group's growth in Latin America this week. The move makes sense following the spin-off of Holcim's North America business in late June 2025...

global cement MAGAZINE

The leading
audited cement
magazine

The world's most widely-read cement magazine

28,553 total circulation

Global Cement Magazine is *the world's most widely-read cement magazine*, as well as being the top-rated cement magazine*. As well as its **audited** printed postal distribution, Global Cement Magazine uniquely has a very large **audited** digital circulation. In the popular PDF magazine version, all advertisements link through to advertiser websites, for increased reader response levels.

In 11 issues per year, Global Cement Magazine covers all aspects of the cement sector, from quarrying to despatch. Each issue has an in-house global cement industry trends article, a country or regional report, a cement plant site report, technical features, comment and all of the latest region-by-region cement industry news.

The figures given are for audited circulation: *Readership is even higher!*

Audited circulation**:

1025

Average monthly **print** circulation of Global Cement Magazine, July 2023-June 2024***

27,528

Average monthly **digital** circulation of Global Cement Magazine

Global Cement Magazine's print and digital circulation is audited by the Audit Bureau of Circulation (ABC) - and its print circulation has been continuously audited by ABC since 2003. Please see www.GlobalCement.com for the latest ABC audited print and digital circulation certificates, or search 'Global Cement ABC certificate' online.

Global Cement Magazine readers are budget holders: 31% have a personal procurement budget of up to US\$10,000, 31% of up to US\$1m and 20% have a budget of over US\$1m.*

Global Cement Magazine readers are decision makers: 40% are involved in technical procurement decisions; 31% are involved in procurement decisions on a management basis.*

*Global Cement Survey 2025 †Percentages that do not sum-up to 100% are due to rounding.

Circulation numbers from ABC certificate July 2023-June 2024 (24-25 numbers pending). *Excluding event distribution copies (average 177/month).

global cement DIRECTORY 2026

The unique listing of all of the world's cement plants

The *Global Cement Directory* is the unique annual publication - in print and digital editions - that lists all integrated and cement grinding plants in the world, listing 2366 integrated facilities, over 700 grinding plants and 320 cement-based boards plants over 304 pages.

The Global Cement Directory has been fully revised, to ensure the most up-to-date listing possible.

The pre-print beta digital version of the *Global Cement Directory* is distributed FREE in November 2025 to our 35,000+ registered contacts. The final authoritative print and digital PDF versions are made available at the start of the following year.

The *Global Cement Directory* contains...

- The most complete listing of integrated and grinding plants available worldwide;
- The number of kilns at each plant and whether it uses wet, dry or other production processes;
- Up-to-date plant capacity information;
- Newly-updated telephone and fax numbers for plants (where available);
- News of planned upgrades, with estimated completion/commissioning dates (where known);
- Maps showing plant locations;
- Country reports for key countries and regions;
- Totals of integrated capacities by country and region;
- Cement-based board manufacturers

Advertising deadlines

Digital beta version

Advertising order deadline: 30 October annually
Advertisement material deadline: 5 November annually

Printed final version

Advertising order deadline: 5 February annually
Advertisement material deadline: 10 February annually

Precise Positioning - Advertise in sections that cover your current or future markets.

COUNTRY & REGIONAL TOTALS

Region	Country	Integrated Capacity (Mtpa)	Grinding Capacity (Mtpa)	Cement-based Board Capacity (Mtpa)
EUROPE WEST	France	1.2	0.5	0.1
	Germany	1.1	0.4	0.1
EUROPE EAST	Poland	1.0	0.3	0.1
	Czech Republic	0.9	0.2	0.1
ASIA	China	10.0	2.0	0.5
	India	8.0	1.5	0.2
AMERICA	USA	7.0	1.0	0.1
	Brazil	6.0	0.8	0.1

Data - Capacity counts for countries / regions with integrated cement plants.

Huge sections for major markets - Including data for China.

GlobalCement.com

is the leading website for the
global cement industry, with

67,014

unique visits per month (Nov. 2024).

(Google analytics).

GlobalCement.com offers visitors news, magazine articles, diary dates and links, and is one of the global cement industry's most-visited sites.

Further development of the site will take place through 2026, with additional news and content making *GlobalCement.com* the 'go to' cement destination on the internet.

Banner Advert - Prominent advertising opportunities at the top of every page.

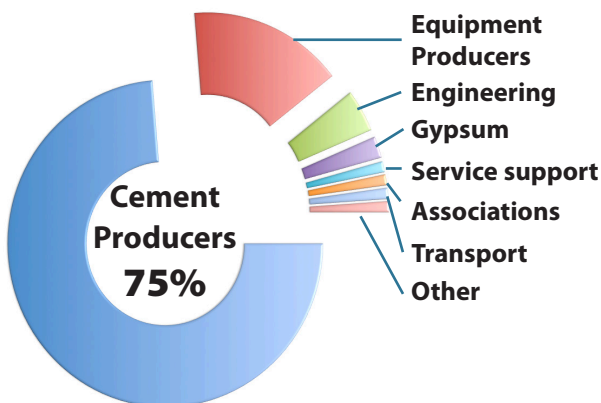

News headlines - Advertise against the latest global cement industry news.

Maximising profits from cement industry decarbonisation

Trends, networking, clinker factor reduction,
process optimisation & control, CDM, SCMs
& ARMs, Graphene, CBAM, EU ETS, LC3, PLC *and more...*

The 6th Global FutureCem Conference and Exhibition on cement and lime industry decarbonisation - established in 2011 - will once again bring together scientists, engineers, cement and concrete producers, equipment manufacturers, chemists, consultants, academics, financiers, regulators and entrepreneurs ... and all others with an interest in helping to reduce the environmental impact of cement and concrete production, through decarbonisation.

Maximising AF use in the Asian cement industry

Alternative fuels for cement and lime in Asia
Asian and national AF market trends
Best practice and case studies in Asia

Bangkok, Thailand

cemfuelsAsia.com

#cemfuelsasia

Global Cement's 1st CemFuels Asia Conference & Exhibition will bring the same level of technical expertise and market knowledge to Asia, as has already been shown in the 'Global' edition of the event in Europe. The conference will have a pronounced Asian 'flavour', with case studies and best practice from throughout the region. The potential for the Asian cement industry to use more alternative fuels - particularly climate-neutral biomass - is huge, and the 1st CemFuels Asia event is guaranteed to help the industry along to its goals.

The event will take place in easily-accessible and always-popular Bangkok, and is set to draw delegates from around Asia - and beyond.

If you have an interest in alternative fuels for cement and lime production in Asia, then you must attend!

Making cement industry CCUS a reality

**Regulatory and legislative updates
Technological and economic trends
Logistical and sequestration solutions**

Hamburg, Germany

cemccus.com

#cemccus

Global Cement's Global CemCCUS Conference has now established itself as the premier event for carbon capture in the cement industry, with one attendee commenting that it was *"The best conference I participated in during almost 20 years of professional life."*

The event will equip producers with the knowledge *and contacts* to enable them to successfully navigate the world of carbon capture, use, and/or sequestration.

The 3rd Global CemCCUS Conference will cover the array of technical options for carbon capture from the challenging flue gas produced by the cement industry, as well as looking at the legal and regulatory landscape, and future trends.

If you want to get ahead in cement and lime industry carbon capture, use and/or sequestration - then you must attend!

#globalcementAI

AI and automation for cement industry optimisation

Optimising cement production with AI
Automation possibilities and practicalities
Technical trends, networking and business...

It is now clear that artificial intelligence will make huge inroads into the cement industry, helping to optimise every aspect of cement production, including the pyroprocess, control systems, maintenance, product performance and logistics. At the same time, automation continues apace, including advances in sensors and control equipment.

With recruitment into the cement industry becoming a persistent problem - and in light of an ongoing 'retirement crisis' - AI and automation are strong options for cement plant optimisation and maintenance.

Attend the first Global CementAI Conference to discover the state-of-the-art, and to make crucial new contacts in this fast-evolving business sector!

Introduction to exhibiting with us

Pro Global Media organised its first event in 1999 and we have aimed to perfect our exhibition offering ever since. Every event is analysed to find out what delegates and exhibitors liked most, so that we can optimise future events.

Critical to the success of the events are our focused topics: Each event is the leader in its field and each is strongly supported by industry associations.

Exhibitors are at the heart of our events: We invite you to come and exhibit at some of the most cost-effective business-to-business exhibitions in the world!

Standard Booth Pricing:

Booth €5495
Space-only €4795

What's included in your stand

Our standard exhibition booths include the following:

- One free, full delegate registration, including access to all social events;
- Size: 3m (9'9") wide x 2m (6'6") deep - White melamine walls, 2.5m (8'2") high;
- Fascia board to display your company name;
- Brochure display shelves, information desk, table and two chairs;
- Power socket, halogen spotlights.

All-inclusive packages are available:

Booth + Delegates + Sponsorship + Online and Print Advertising. **Contact us for options.**

Stand shown is a double stand - 6m x 2m

global gypsum DIRECTORY

The unique listing of all gypsum wallboard plants

The *Global Gypsum Directory* is a unique annual publication that lists all gypsum wallboard plants in the world. The 2026 edition is the largest so far, listing 455 facilities over 86 gypsum sector pages and 1110 insulation manufacturing plants in the global insulation section. The 2026 directory includes a section on natural gypsum sources worldwide, as well as a listing of gypsum fibreboard factories.

The pre-print beta version of the *Global Gypsum Directory* is distributed FREE in November to our 10,000+ contacts, ensuring a massive audience for your message. The final authoritative print and digital PDF versions are available in February the following year.

Advertising deadlines

Digital beta version

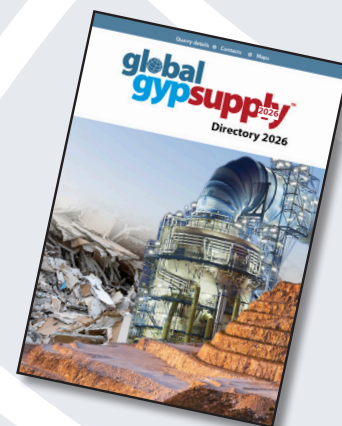

Advertising order deadline: 30 October annually
Advertisement material deadline: 5 November annually

Printed final version

Advertising order deadline: 5 February annually
Advertisement material deadline: 10 February annually

The *Global Gypsum Directory* contains...

- The most complete listing of gypsum wallboard plants available worldwide;
- The number of lines and capacities at each plant;
- Telephone and fax numbers for plants (where available);
- News of planned upgrades, with estimated completion / commissioning dates (where known);
- Maps of plant locations;
- Country reports for key countries and regions.

global insulation DIRECTORY

The *Global Insulation Directory* is published in the same volume as the *Global Gypsum Directory*. It lists all of the world's insulation production facilities, as well as providing counts for different types of plant (mineral wool, glass wool, EPS, XPS, PU, etc...) worldwide. The 2026 edition has been fully updated and revised, listing more than 1110 plants worldwide.

globalgypsum.com

is by far the leading website for the
global gypsum industry, with

12,624

unique visits per month (in July 2024).

GlobalGypsum.com offers visitors news,
magazine articles, diary dates and links.

Further development of the site will take place
through 2026, with additional news and content,
making *GlobalGypsum.com* the 'go to' destination
for information in the gypsum wallboard sector.

Banner Advert - Prominent advertising
opportunities at the top of every page.

*Location to be announced at the
Global Gypsum Conference
in Amsterdam in October 2025

The annual *Global Gypsum Conference* is well-known around the world as the largest meeting of gypsum professionals and as the must-attend gypsum event. The event in 2026 will once again attract delegates and exhibitors from around the world. A high point is always the spectacular Gala Dinner and presentation of the Global Gypsum Awards.

Non-standard material

If your advertising material does not coincide with any of these standard sizes and formats, please advise format and we will give you a quotation. Our magazines also feature a classified section, with costs as shown left. For other sizes see page 24 or contact Paul Brown at paul.brown@propubs.com.

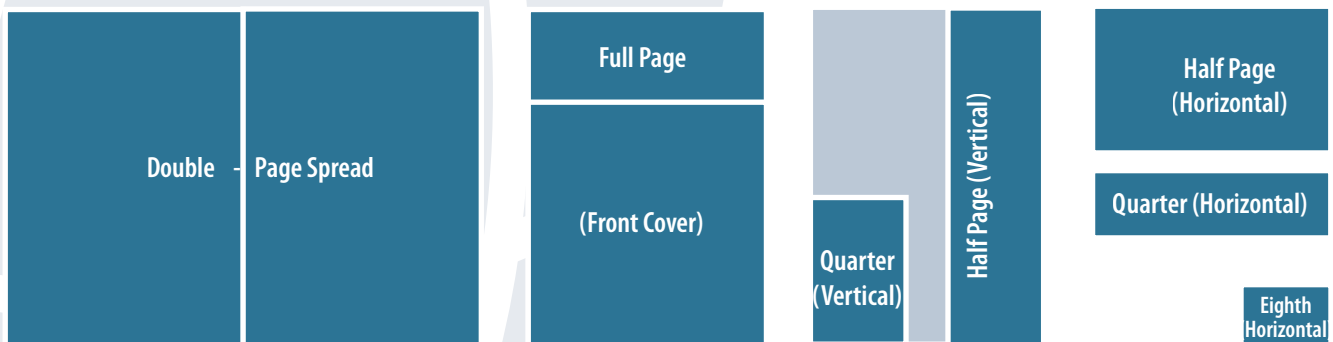

Mechanical data

All our magazines are computer-to-plate produced in DIN A4 format. Advertisement material should be supplied in PDF format, in CMYK colour format. When producing your PDF, ensure that all fonts are embedded, and specify the highest-quality JPG compression for all pictures.

PDF advertisements should be sent by email to production@propubs.com.

Ready-printed inserts must be supplied uncut and unfolded. Insert costs subject to sight of copy.

Social media marketing with *Global Cement* and *Global Gypsum*

Our brands have market-leading positions on social media for Global Cement, Global Gypsum, Global Insulation and Global Slag, for X/Twitter, Facebook, LinkedIn and email.

Customers can take advantage of our leading position on these social networks by marketing to the members of our communities by the use of sponsored messages.

Pro Global Media offers customers two approaches to Social Media marketing: '**Pick and Mix**' and '**Packages**'.

In the **Pick and Mix** option, the customer chooses the number of individually-priced types of Social Media interactions that they wish to employ (for example, three sponsored 'Tweets,' a Facebook post, four LinkedIn posts and two emails).

In the **Packages** option, the customer chooses their preferred package, consisting of a set number of 'Tweets,' Facebook posts, LinkedIn posts and emails:

Package	Standard	Silver	Premium	Gold	Platinum	Diamond
'Insertions'	1 of each	2 of each	3 of each	4 of each	5 of each	6 of each

Customers are able to specify the timing of each interaction with the target audience. Customers are responsible for supplying the relevant materials (text, links, graphics) for each type of social media interaction (see below).

E-blast (email mail-shot): specifications:

- Emails include a standard 'sent by...' footer
- Emails include a standard Privacy note and Unsubscribe footer
- All links should be live
- Graphics and links can be included

Facebook posts: specifications:

- 200 word maximum
- Must start with the words 'Sponsored post'
- All links should be live
- A graphic or a link can be included

LinkedIn posts: specifications:

- 200 word maximum
- Must start with the words 'Sponsored post'
- All links should be live
- A graphic and/or a link can be included

'Tweets': specifications:

- 140 characters maximum
- Must start with the words 'Sponsored Post'
- All links should be live
- Post threads count as separate posts
